

SCULPTED THREE-DIMENSIONAL CAP PANEL

Abstract of the Disclosure

A cap panel or cap panel insert and methods of making the same
5 having three-dimensional aspects to enhance the aesthetic appearance is hereby
provided. A cast paper product is used for the various three-dimensional designs in
or on the cap panel or cap panel insert. In particular, a three-dimensional design
may be formed integral to the cap panel or cap panel insert through a molding
process that provides a wide variety of sculpted shapes that can be tailored to meet
10 the specific desires of a family to reflect a particular feature or trait of the deceased.
The cast paper cap panel or cap panel insert can be integrated into a dish assembly
to provide the decorative aspects of a burial casket lid during a showing.
